Align lid with container. Press hard over the corners of the container until you hear the "clicks"

#### **OPENING**

Turn the circular part of the lid clockwise until vou hear "click'

#### PRE-CLOSURE

Provisional closure is achieved by turing the circular part of the lid anticlockwise until you hear "click"

#### **FINAL CLOSURE**

To achieve final closure, check that the lid is fully turned anticlockwise until you hear the "click" indicating that the provisional closure position has been reached. Then press all the perimeter of the yellow tab until "clicks" are heard

#### **TRANSPORT**

Once the container has been definitively closed, it can be transported using its handle

#### REMOVAL OF MATERIAL

For correct extraction open the lid fully until you hear "click"

Extraction system for needles and utensils
